Training centre at GIT to offer designing courses

BELAGAVI, DHNS: KLS Gogte Institute of Technology (GIT) announced its exclusive joint venture with Britain's leading Training and Design Company, Spires Engineering, Oxford, United Kingdom for setting up state-of-the-art training centre for Dassault Systems certified CATIA V5 and other related designing courses at GIT.

This would be the first of its kind joint venture in an engineering college by Spires Engineering, London in India.

The joint venture agreement was signed on Tuesday by GIT Governing Council Chairman

U N Kalkundrikar and Rushikesh Kulkarni, Head India Operations, Spires in the presence of Principal A S Deshpande, members of GIT Governing Council, Prof Satish Hukkeri, Training and Placement Officer Rajashree Patil, Director-Business Development, Spires Engineering.

Spires Learning centre would offer certification courses from Dassault Systems, which is the leading international brand in design software and has recognition from top industries and clientele of Spires viz, Boeing, Airbus, Eti-

had airways, Strata Aerospace UAE and other allied aerospace and manufacturing industries around the globe.

Students would also get unique opportunities under the joint venture for getting practical training on Microlite aircraft operations and experience flying at nominal course fees. The joint venture would bring world class training for students of mechanical and industrial production right inside GIT. The certification would catapult GIT students placement potential by many a miles.
